International PoP

DESCRIPTION

Gtd has an international presence and has developed high availability interconnections to form an MPLS network with an international presence in PoPs:

Miami
EE.UU.

El Poblado
Medellín,
Colombia

Surco
Lima, Perú

São Paulo
Brasil

Santiago
Chile

Chile • Santiago

Perú • Lima

Colombia • Medellín

USA • NAP Americas Miami

Brasil • PIT Sao Pablo

International PoP

CHARACTERISTICS:

- Presence in the main Datacenter of Chile, Peru and Colombia.

- Velocidades de conexión desde 2 Mbps hasta 10 Gbps.

- Transparent links, allowing any Ethernet-based traffic, not just IP.

- Prioritization of traffic (Quality of Wholesale Service).

- Layer 2 and layer 3 services.

- Operation with 24/7 maintenance.

- Monitoring of links with different levels of detail, which allows you to know the status of your data links at all times.

Dedicated Cloud Connections

Gtd's Points of Presence in Miami and Sao Pablo allow connection to the most popular public clouds, allowing our clients to have connectivity to the Cloud with shorter lag times, better performance and a better service experience.
