Metropolitan Networks

DESCRIPTION

Gtd has metropolitan networks with different connectivity solutions tailored to your project's needs.
Gtd highlight its OTN - DWDM networks that allows the company to deliver backups and backs of the type 1 + 1 and 1 + 1 + R.

CHARACTERISTICS:

- Presence in the main Datacenter of Chile, Peru and Colombia.

- Connection speeds from 2 Mbps to N x 100 Gbps.

- Transparent links, allowing any traffic based on Ethernet, not just IP.

- DWDM networks with high level of redundancy (options 1 + 0, 1 + 1, 1 + 1 + R).

- Interconnection through Fiber Optic links and Radio Links.

- Traffic prioritization (Wholesale Service Quality).Layer

- 2 and Layer 3 services.

- Operation with 24/7 maintenance.

Link monitoring with different levels of detail, which allows you to know at all time the status of your data links.
